REFRESHING FASHION.

The protection you deserve - Stay fresh 24x7.

Livinguard Technology deactivates viruses and bacteria, including odor causing bacteria, giving you the protection you deserve while keeping you looking and feeling fresh all day long.

Protection that's odor free*

Livinguard shirts deactivate viruses and bacteria, including odor causing bacteria non-stop to keep clothes protected and smelling fresher for longer.

Hassle-free comfort

All Livinguard Polo-Shirts are made with premium soft cotton for excellent comfort and wearability. Aside from providing long-lasting freshness, they're also wrinkle-free for a great look in any situation.

Sustainable

Livinguard Polo-Shirts don't need to be washed as often as conventional ones, saving water, energy and detergent.

*Antibacterial activity on Staphylococcus aureus, and external consumer panel test to measure odor prevention.

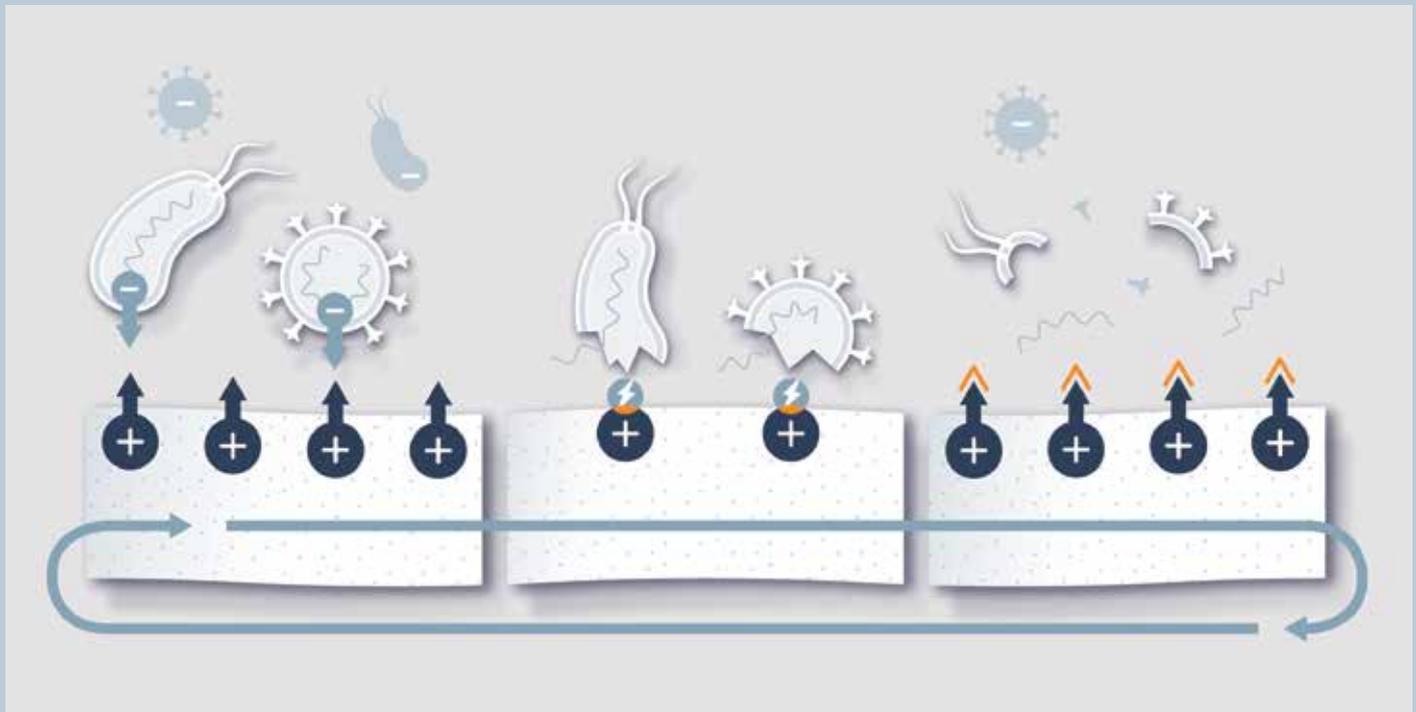

THE TECH IN THE TEXTILE.

From COVID-destroying PPE to water purification and air filtration, Livinguard Technology safely and permanently deactivates viruses and bacteria at the molecular level. By empowering materials with a strong electric charge, we ensure they remain non-toxic, permanently protected and safe for the environment throughout their lifecycle.

THE RESULT:

HOW DOES THE LIVINGUARD ANTIVIRAL AND ANTIBACTERIAL TECHNOLOGY WORK?

1. CAPTURE

Materials treated with Livinguard Polycationic Technology are positively charged and capture negatively charged microbes like a magnet.

2. DEACTIVATE

Upon contact the negatively charged cell walls of the microbes are disrupted and rendered harmless.

3. REPEAT

The deactivated microbes disappear and the material is ready to protect again.

THE FUTURE OF FASHION IS FRESH.
